Art Unit: 3641

1. The disclosure is objected to because of the following informalities: The written disclosure lacks section headings (i.e. "Background of Invention"; "Detailed Description"; "Brief Description of Drawings").

Appropriate correction is required.

2. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 lacks terminology to indicate where the body of the claim starts and the preamble of the claim ends (e.g. comprising, including, consisting of, etc.). Absence of such terminology not only makes the breadth of the claim unknown but also makes the claim indefinite as to whether the claim is intended to be open-ended or close-ended in nature.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Love.

Love discloses an arrangement comprising:

- | | |
|--|-------------------|
| a) an array of blast-resistant partitions; | 15, 19, 53 |
| b) subdivided space; and | see figs. 1, 2 |
| c) a public transport vehicle. | col. 1, lines 1-7 |

5. Claims 1-2 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Law.

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Law in view of Madden Jr..

Law applies as previously recited. However, undisclosed is bullet proof cloth that is Kevlar. Madden Jr. teaches a bullet proof cloth that is Kevlar, col. 5, line 67. Applicant is substituting a particular type of bullet proof cloth for the generic bullet proof cloth of Law in an analogous art setting. It would have been obvious to a person of ordinary skill in this art at the time of the invention to apply the teachings of Madden Jr. to the Law apparatus and have an apparatus that included a particular type of bullet proof cloth.

8. Claims 1-2, 4, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Fenton.

Fenton discloses an arrangement comprising:

- a) an array of perforated blast-resistant partitions; 5, 10, 26, 28, 23, 25
- b) subdivided space; and see figs. 1-3
- c) a public transport vehicle. col. 1, lines 9-17
